Morris, NJ	**23,948**	Luzerne, PA	**7,590**
Warren, NJ	**21,550**	Carbon, PA	**5,749**
Pike, PA	**13,953**	Wayne, PA and Passaic, NJ	**3,897**

WHAT YOU GET

- A full-time subchannel on one station or both, in HD or SD (ATSC 1.0, works on any digital TV)
- Send one feed (SRT or IP) to our Stroudsburg headend; we handle encoding, PSIP and IDs
- Redundant microwave paths to both towers
- Flexible terms; two-station packages

Stroud Broadcasting is a d/b/a of Gravel Hill Holdings, LLC.

Figures are predicted population and households inside each station's FCC service contour (Channel 5: 43 dBu; Channel 29: 50.2 dBu), computed with the FCC's TVStudy software from 2020 Census data, before interference from other stations. Combined figures count the area both stations cover only once. Actual reception varies with terrain, antenna and location. Facilities shown are as authorized (Channel 29) or as specified in the pending application (Channel 5) and may change.
